

# Clownfish

From Australia

Fish

What's on your mind?

Did you know there are 30 different types of species of clownfish? I am immune to stings from sea anemone, and I live in groups called schools.

Pufferfish

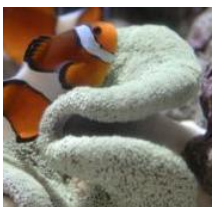

Edible Frog

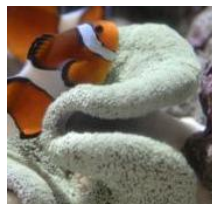

Umbrella Bird

I'm orange with 3 white stripes. I also have black margins. I am also about 2 to 5 inches long.

I am most likely to eat algae, plankton, and mollusks.

I live in a coral reef that is multi-colored and looks like a sponge.
