

Glass Frog

From Mexico

facebook group Amphibians

What's on your mind?

Did you know that I'm see-through like no other amphibian? Sometimes you can see my insides! I'm also very colorful!

I look like some amphibians, but I can glow and I'm see-through like glass! I also have purple-ish eyes!

I like to eat bugs. The size of the bugs I like to eat depends on how big I am. The smaller the frog, the smaller the bug. My tongue is formed to the front of my mouth rather than the back. That's why my tongue is very long!

My home is the leaves on trees. Sometimes I like to climb on the branches and enjoy the view. My home is a watery leaf which is perfect to lay eggs.
